## ASGCO® - Fourthane® Solutions for Fast Repair of Conveyor Belt Covers

SPECIALLY FORMULATED TO BE APPLIED IN CONVEYOR BELTS THAT WORK UNDER HIGH IMPACT AND ABRASION

### DESCRIPTION

**ASGCO® - Fourthane®** is a liquid material designed to be applied with a spatula or a similar tool. After a relatively short period of curing time it achieves physical properties similar to the conveyor belt's rubber cover.

**ASGCO® - Fourthane®** product is provided in a kit of 26.5 Ounces (750 grams), which includes the synthetic rubber and catalyst. With the proper primer, the product can also be applied to non rubber surfaces such as steel, concrete, wood, etc.

### How to use ASGCO® - Fourthane®

Buffer the surface to be repaired with a rotating wire brush. Wash the area, using the cleaning agent and then apply the primer provided with each kit.

Vigorously mix **ASGCO® - Fourthane®** and its catalyst. It is very important to achieve an even mix. The **ASGCO® - Fourthane®** and the catalyst should be mixed for at least one minute. Apply the **ASGCO® - Fourthane®** over the treated surface within 2-3 minutes after mixing. A spatula or similar tool can be used to spread the **ASGCO® - Fourthane®** over the area to be repaired.

### Typical Applications:

- Restore belt covers worn from skirtboard contact
- Restore belt covers on feeder belts
- Patch impact damaged areas of feeder belt covers
- Repair of longitudinal cuts in steel cord and fabric belts
- Refurbish damaged belt splice areas
- Renovate rip detection antenna installation areas

### Each Kit includes:

- **ASGCO® - Fourthane®** resin.
- Cleaning Agent
- Primer
- Catalyst
- Brush
- Latex Gloves

### Productivity

After applied, it only requires 10 minutes to dry and 1 hour to setup, minimizing down time, accomplishing time and money saving.

### Easy Application

Specially formulated to be used in the field with very few tools and personnel.

### High Tear and Impact Resistance

The high tear and impact resistance of the **ASGCO® - Fourthane®** Red Line, allows the users to repair rubber coatings and conveyor belt covers of heavy demand, such as feeder belts.
