

RAZOR-BACK MDX™

Above & Underground Mine Duty Belt Cleaner

The **Razor-Back MDX™** is a secondary belt cleaner. It is designed for high speed and maximum tonnage mining systems running in the most aggressive underground and surface mining environments. The heavy-duty, replaceable, carbide-tipped blades effectively clean the conveyor belt with our dual action tensioning system to maintain even pressure across the entire belt surface.

- **Complete Cleaning** - with our combination of cleaning blades specific for your application and dual tensioning action from our Spring-Shoc™ or Air-Shoc™ tensioner along with the impact absorbing rubber tensioning cushions and mounting system.
- **Quick-Change** - slide-out mounting system allows for simple removal of the cleaning cartridge from either side of the conveyor, without having to remove mounting brackets or the main mounting tube.
- **Designed** - for the toughest of mining environments and conditions including underground and surface coal, hard rock, power plant and load-out facilities.
- **Compatible and Safe** - for mechanically or vulcanized spliced conveyor belts and its slide-out blade cartridge allows for improve safety by avoiding workers having to crawl into confined chute areas or underneath conveyor structures.

Available in 3 Blade Types

Razor-Back MDX™ with V-tip installed on this conveyor belt at a major copper ore mine.

Razor-Back MDX™ is installed on this "super portable" stacker. It's easy to install and allows for simple removal of the cleaning cartridge.

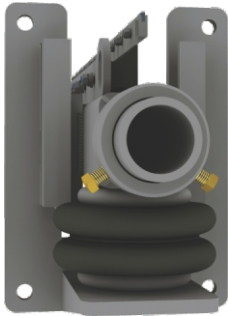

Razor-Back MDX™ with spray bar attachment is installed for more efficient cleaning at this iron ore facility.

Providing the World Material Handling Industry with Productive, Safe and Reliable "Complete Conveyor Solutions."
