Urethane Products

Buffalo Wire Works offers a full range of urethane products to screen your most difficult materials. These high-quality products offer long life in both wet and dry applications.

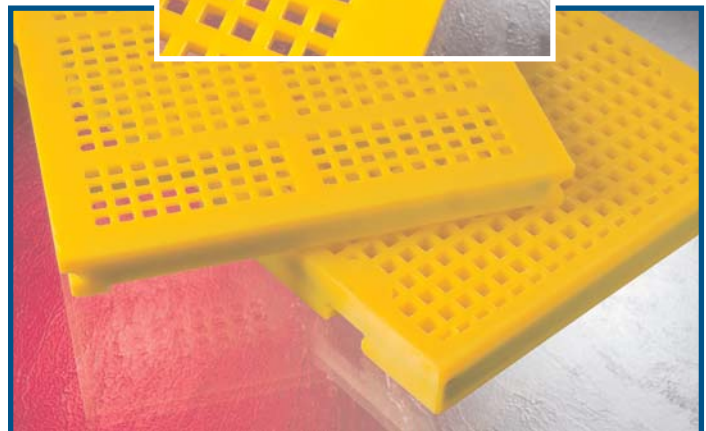

Products Offered:

- Modular screens
- Side tension screens
- Complete chutes
- Classifier shoes
- Urethane support channels
- Urethane coated tension rails
- Urethane sheets
- Weldable liners
- Many other accessories
- Tension mat screens
- Crown deck conversion kits

Product Attributes:

- Superior abrasion and wear resistance
- Excellent toughness and tear resistance
- Exceptional resilience and tapered openings helps reduce plugging and blinding
- Exceptional resilience and tapered openings helps reduce plugging and blinding
- Significant noise reduction over traditional metallic screening media
- Light weight and easy change out
- Excellent toughness, tear resistance, and durability
- Wide array of openings and sizes to meet your specific application
- Available in maximum open area designs

Buffalo Wire's urethane screen media solutions solve your toughest screening problems. Our products provide efficient screening of materials in many industry applications such as dewatering, mining, sand, stone, gravel and many others.

Providing over 139 years of Engineering, Innovation and Customer Service.

Clean Deck

Rubber Products

Buffalo Wire Works offers a wide range of rubber products to screen the toughest and most abrasive materials. For example, crushed stone, gravel, coal, granite and many others where cut, tear, and impact resistance is essential.

Products Offered:

- Modular screens
- Steel backed screens
- Tension screens
- Solid rubber liners
- Haul truck liners
- Rubber and ceramic liners
- Complete chutes
- Impact bars
- Modular wear liners
- Wear classifier shoes
- Skirt board rubber
- Crown bar rubber
- Shaker balls
- Center hold down rubber
- Rubber coated tension rails
- Crown deck conversion kits

Product Attributes:

- Impact resistance – hydraulic effect
- Abrasion resistance
- Noise reduction
- High wear resistance – proven longer screen life
- High tensile strength
- Designed for maximum throughput
- Not all rubber is the same - we offer highly specific compounds to solve highly specific problems
- Compressed rubber – 15-20% denser
- Rubber media products designed to fit any application
- Wide array of openings and sizes to meet your specific application
- Available in maximum open area designs

Protect your investment, rubber materials provide flexibility, impact absorption, strength and extended life for reduced down time. These products also facilitate fast and easy installation.

Providing over 139 years of Engineering, Innovation and Customer Service.
