Complete Conveyor Solutions

ADVANCED CERAMIC WEARPLATE Mine Duty X-Wear

"MDX X-Wear" Impact Absorbing Abrasion Resistant Wear Plate

These ceramic / rubber wear plates have been solving high wear and impact issues in many hard rock mining applications where other products have failed. The combination of ceramic and rubber provides for both the impact of the product onto the plate as well as a high alumina content ceramic cylinder that is made for abrasion.

ASGCO **Mine Duty X-Wear™** is made of extremely hard ceramics that provide unsurpassed resistance to abrasive wear while the rubber effectively dampens the impact forces that can crack the ceramic rods. The resilient rubber matrix that surrounds the ceramic rods is hot vulcanized for superior adhesion.

- **Wide Range of Use** - X-Wear Mine Duty is mainly used in the mining and quarrying industries, where severe abrasion occurs and the angles of impact are low.
- **Excellent Wear Protection** - For tough mining conditions where there is a need for both wear protection and low noise materials.
- **1/4" Steel Backing** - is suitable for stud welding, plug welding or self-tapping screws.
- **Longest Wear Life Available** - Unique zigzag pattern prevents wear channeling.
- **Easy to Install**

- **Wide Range of Use** - X-Wear Mine Duty is mainly used in the mining and quarrying industries, where severe abrasion occurs and the angles of impact are low.
- **Excellent Wear Protection** for tough mining conditions where there is a need for both wear protection and low noise materials.
- **1/4" Steel Backing** is suitable for stud welding, plug welding or self-tapping screws.
- **Plates are available** with factory-welded mounting studs for ease of installation.
 - Please send drawing of bolt configuration
- **Unique Zigzag Pattern** prevents wear channeling.
- **Typical Examples:**
 - Transfer points in conveyor systems
 - Screen chutes
 - Deflectors Feeders

PART NUMBER

ASG-12x12X1.25-MDX

DESCRIPTION

Mine Duty Wear Liner, 12"x12" Steel Backed Ceramic
