

DURA-TUFF™

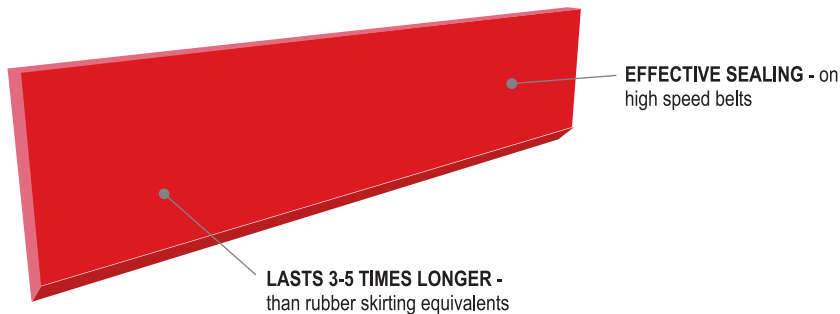

Urethane Conveyor Skirtboard Sealing

ASGCO®

Complete Conveyor Solutions

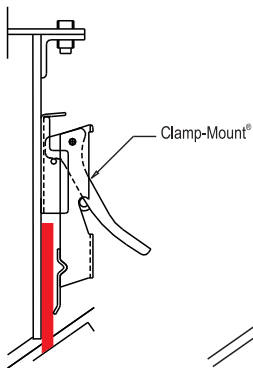

ASGCO®'s **Dura-Tuff™ Urethane Conveyor Skirting** is made of an extremely tough 62 durometer polyurethane skirting that lasts an average of 3-5 times longer than rubber skirting equivalents.

Dura-Tuff™ is available in 50' rolls with a beveled edge that matches the troughing angle of your belt, eliminating the "break-in" adjustment and providing an even greater advantage.

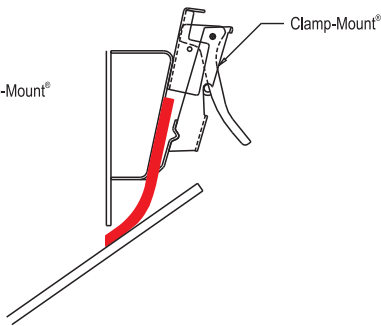

- **Abrasive and Cut Resistant** - Dura-Tuff™ is the toughest and most cut resistant 62 durometer polyurethane material available anywhere.
- **Works Great** - in abrasive and impact area conditions where cut and gouge is a problem, as seen in hard rock and iron ore mining.
- **Effective Sealing** - on high speed belts
- **Excellent for Hard Rock Mining** - such as granite, trap rock, iron ore, oil sands, and copper and gold ore mining conveying applications.

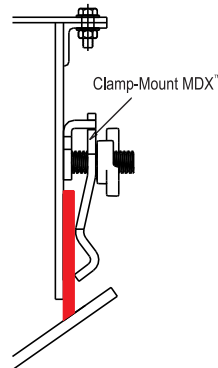

Dura-Tuff™ used with Clamp-Mount®

Dura-Tuff™ used with Clamp-Mount® and Support Plate
