

CLAMP-MOUNT MDX™

(Mine Duty) Conveyor Skirtboard Sealing System

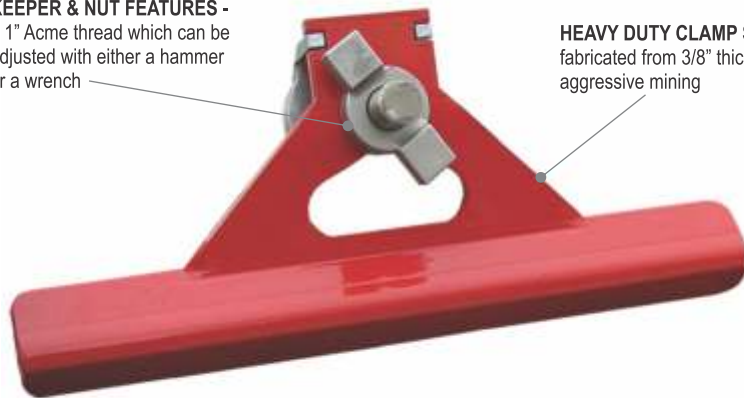

ASGCO®

Complete Conveyor Solutions

The **Clamp-Mount MDX™** skirting clamps help eliminate spillage and dust in the conveyor transfer point. The Clamp-Mount MDX™ installs easily and allows for one person to replace or reposition skirt rubber.

KEEPER & NUT FEATURES -
a 1" Acme thread which can be
adjusted with either a hammer
or a wrench

HEAVY DUTY CLAMP SYSTEM -
fabricated from 3/8" thick steel for
aggressive mining

- **Increase Performance** – by helping to eliminate spillage and dust in the conveyor loading zone.
- **Reduce Conveyor Downtime** – by the simple clamp adjustment and release to allow repositioning or changing out skirting in minutes versus hours, without tools.
- **Mine Duty Construction** – 18" or 24" heavy duty clamp system with keeper, fabricated from 3/8" thick steel for aggressive mining applications.
- **Easy Adjustment** – Patent pending adjustment nut is cast 304 stainless steel.
- **Versatile** – Can be used with any of ASGCO® skirting sealing compounds.
- **Keeper & Nut Feature** – The keeper and nut features a 1" Acme thread which can be adjusted by using a hammer or a wrench.
- **Will Automatically Adjust** – To any thickness from 1/4" to 1 1/4".
