to structure.

Wrenches and Hand Tools

Roller Cassette Rules to always follow:

Always have the center roll height of the Roller Cassette match the troughing **roller** before and **after** the Roller Cassette.

Location Selection:

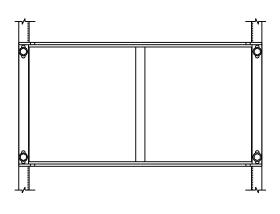

Generally the Roller Cassette (s) is located in the load zone area of the conveyor where minimum deflection of the skirt is necessary to eliminate spillage from the skirt seal. At times Roller Cassettes are purchased to decrease impact damage from high impact areas, in these areas the Roller Cassette should be placed at the point of highest impact.

Installation:

Remove the existing troughing rollers where the Roller Cassette (s) are to be installed.
