ASGCO® Razor-Back® with Spray Bar Secondary Belt Cleaner

Allentown, PA.: ASGCO® “Complete Conveyor Solution’s” introduces Razor-Back® with Spray Bar, a secondary belt cleaner that uses a row of nozzles to spray a fine mist onto the conveyor belt where the material is difficult to remove. Water is applied to the belt in an overlapping spray pattern which places the particles into a fluid suspension, while moistening the belt. The blades of the Razor-Back® with Spray Bar are then able to make consistent contact with the belt surface to remove 75% of the course carry-back, prevent overloading and improve cleaning efficiency

Features & Benefits:

- Will remove 75% of course carry-back thus preventing overloading
- Sprays are built into the cleaner enabling installation in the tightest of spaces.
- Cleaning system performance is improved by a minimum of 50% over similar dry systems and maintenance is reduced because of the lubricating action of the water.
- Fine atomized water from the spray bar nozzles mixes with any dust generated within the chute, causing the dust to fall from the atmosphere.
- The continual flushing action of the sprays ensures minimal build-up on chute walls.
- Spray sizes can be installed which limit the volume of water applied.
- Full stainless steel construction including tungsten carbide tip holder, cushion plates and fasteners.
- Tungsten carbide provides long service life with a high level of resistance to impact damage and/or acid leaching.

About ASGCO®

ASGCO® “Complete Conveyor Solutions” founded in 1971 and headquartered in Allentown, PA is a leading manufacturer, distributor and service provider of proprietary conveyor and screening equipment and accessories that improve the safety and performance of bulk material handling systems.

ASGCO® is a diversified and innovative company with three major divisions that serve specific targets of the material handling industry. The growth of the company, over the years, is due to recognized improvements in the efficiency, safety and productivity of our customers operations. At ASGCO® we continue to strive to make the handling of bulk materials more efficient, safer, and more productive.
