ASGCO® Announces Our NEW Dual Return Tru-Trainer® Conveyor Belt Tracking System

Allentown, PA.: ASGCO® “Complete Conveyor Solutions” announces a new addition to their line of Tru-Trainer conveyor belt tracking idlers. The Tru-Trainer® idlers react as the conveyor belt moves off center, maintaining the belt’s original position, minimizing belt wear and conveyor downtime.

Our very successful Dual Return Tru-Trainer® Conveyor Belt Tracker is now available in a V-Return style, developed to accommodate the v-return conveyor systems that see excessive forces encountered when utilizing high tension, overland style conveyor systems, which often operate with wide conveyor belts to accommodate heavy loads.

The V-Return Tru-Trainer® is best for v-return overland conveyor systems. An external central pivot mechanism was designed, obviating the need for a single, large drum, and enabling a concentric and balanced rotation to be achieved. This results in extended bearing life and a very fast and effective conveyor belt tracking system.

About ASGCO®

ASGCO® “Complete Conveyor Solutions” founded in 1971 and headquartered in Allentown, PA is a leading manufacturer, distributor and service provider of proprietary conveyor and screening equipment and accessories that improve the safety and performance of bulk material handling systems.

ASGCO® is a diversified and innovative company with three major divisions that serve specific targets of the material handling industry. The growth of the company, over the years, is due to recognized improvements in the efficiency, safety and productivity of our customers operations. At ASGCO® we continue to strive to make the handling of bulk materials more efficient, safer, and more productive.
