ASGCO® Announces Our Cast Urethane Line of Screen Wear Products

Allentown, PA.: ASGCO® “Complete Conveyor Solutions” is proud to announce the introduction of our Cast Urethane Screen Wear product line. The harsh demands of the quarry and aggregate industry can cause serious damage to vibratory screens. To prevent abusive material and conditions from hindering the productivity of quarry operations, ASGCO® has expanded the use of their Cast Urethane products to include screen wear parts.

Rubber Compounds that are compounded to 90 or 95A durometer have compromised physical properties. Just the opposite is true of polyurethanes which maintain their properties and superior performance characteristics regardless of hardness. All of our urethane wear products are cast from our exclusive ASGCO-thane™ polyurethane compound with a durometer of 80/85, along with steel backing plate for extra added support.

Screen Feed Box Liners are patterned for a direct replacement of the current liner configuration being used, or depending on the wear characteristics change the layout for maximum wear life. Liners have the ability to have various sized and shaped ceramics inserted to increase the longevity of the liner.

Screen Side Wear Liners are boxed in with mild steel or hard plate to prevent premature edge wear or damage. Bolt patterns, sizes, and thicknesses are fully customizable to increase the wear life for your operation. In house engineered to allow for an ease in duplication.

Features & Benefits:

Abrasion Resistant – high-grade polyurethane offers superior abrasion, cut, and tear resistance

Higher Load-Bearing Capacity – better compression set, and superior tolerance to greases, oils, oxygen, and ozone.

Biodegradable – urethane formulated to outlast rubber and stand up to harsh outdoor environments.

Multiple Steel Options – fully boxed with steel, or only steel backed. Can be stud or plug weld

About ASGCO®

ASGCO® “Complete Conveyor Solutions” founded in 1971 and headquartered in Allentown, PA is a leading manufacturer, distributor and service provider of proprietary conveyor and screening equipment and accessories that improve the safety and performance of bulk material handling systems.

ASGCO® is a diversified and innovative company with three major divisions that serve specific targets of the material handling industry. The growth of the company, over the years, is due to recognized improvements in the efficiency, safety and productivity of our customers operations. At ASGCO® we continue to strive to make the handling of bulk materials more efficient, safer, and more productive.
