Bulk Conveyor Systems
Engineered Bulk Conveyor Package Solutions

Baldor Electric company offers a unique service aimed at providing customized solutions for end users. This service, known as System-1, combines the functions of inside sales, marketing and engineering to provide a single source for the design, selection and procurement of multiple component systems.

Once the System-1 Group receives the customer’s specifications, the correct products are selected based on the application criteria. The group then checks product availability and provides a written quote to the customer. Throughout the process, they work to ensure that the order is completed and shipped in accordance with the customer’s due date.

One point of contact within the System-1 Group covers all of the product lines we offer. Whether you need a standard package or are looking for one that is more customized, System-1 is the source for all of your product needs. System-1 also has the capability to ship the total package pre-assembled. If products are to be assembled on-site, the items are boxed together for ease of identification. All orders are tagged on the outside of the pallet or box with the description number designated for the project.

Why Choose System-1?

- Optimized product selection
- Pre-assembled packages
- Project coordination
- Reduces the total cost of ownership
