

*Having major problems with carry-back and housekeeping issues, gaps in the belt due to bad splicing stitches, build-up causing real safety issues as well as increased labor costs for housekeeping?*

### **ASGCO®'s Hands-On Training Can Help Your Facility Run More Efficiently!**

ASGCO® will set up a training session at your facility with one of our project supervisors or field trainers, going on site to demonstrate and to train plant workers on how to do a bias splice installation with mechanical fasteners. Resolving much of the housekeeping and safety issues and allowing your facility to run much more efficiently.

ASGCO® is a certified belt splicing company where all of our service technicians are trained in the latest splice procedures and material usage for conveyor belting.

# LUNCH & LEARN
