ASGCO® Announces New Rotary Brush Cleaner™!

Allentown, PA.: ASGCO® “Complete Conveyor Solutions” announces the latest addition to our line of Secondary Belt Cleaner products. The new Rotary Brush Cleaner™ uses the speed and force of the belt rolling over hundreds of SBR Rubber Fingertips to significantly eliminate material accumulation and dust. Rotary action, finger length and spacing allows the carryback to fall free instead of clogging. Useful on worn or pitted vulcanised or mechanically spliced belts. It is designed to effectively clean chevron, cleated and raised-rib belts without the wear associated with conventional brush-type cleaners.

The Bolt-Up™ style mounting found on the new Rotary Brush Cleaner™ makes for easy adjustment up and down. Allowing the cleaning pitch to be set with the turn of a wrench as the SBR Rubber Fingertips wear. SBR rubber provides abrasion resistance for longer drum service life which ranges from 1 to 3 years depending upon the application, conditions, and the material being transported. Ideal for use with chevron style conveyor belting as seen on pulp and paper applications, wood yards and recycling.

The new Rotary Brush Cleaner™ is available in 18 in. (450mm) to 84 in. (2200mm) belt width with a maximum belt speed of 700 fpm (3.5 m/sec). It can be installed with no motor or with a motor without excessive power consumption. ASGCO®'s Rotary Brush Cleaner takes a new and effective approach to eliminate trapped material. Making installation, adjustment, blade replacement and maintenance fast and easy.

About ASGCO®

ASGCO® “Complete Conveyor Solutions” founded in 1971 and headquartered in Allentown, PA is a leading manufacturer, distributor and service provider of proprietary conveyor and screening equipment and accessories that improve the safety and performance of bulk material handling systems.

ASGCO® is a diversified and innovative company with three major divisions that serve specific targets of the material handling industry. The growth of the company, over the years, is due to recognized improvements in the efficiency, safety and productivity of our customers operations. At ASGCO® we continue to strive to make the handling of bulk materials more efficient, safer, and more productive.
