ASGCO® Announces The New BC-2™ Conveyor Belt Cleaner!

Allentown, PA.: ASGCO® “Complete Conveyor Solutions” announces the latest addition to our line of Secondary Belt Cleaner products. The new patent-pending ASGCO® BC-2™ Conveyor Belt Cleaner provides the best possible cleaning efficiency in the industry. It’s pre-tensioned mechanism provides continuous pressure on each arm with a stainless steel torsion spring and the bolt-on blades are self-adjustable and easy to replace, cutting down on maintenance cost and improving productivity.

The self-tensioning arms on the new BC2™ produces constant tension between the carbide blades and the conveyor using a stainless steel torsion spring. Overlapping tungsten carbide blades and the constant tension generated by the patent pending stainless steel spring self-tensioning arm assembly provide highly efficient belt cleaning. Each blade can be replaced from the arms without the need to replace the arm on every blade change.

Designed for mining and the most demanding applications, our heavy duty corrosion zinc coated steel mountain tube, spring self-tensioning arms and blades provide constant cleaning without the rust of chipped powder coating. The BC2™ is primarily intended for use in medium duty coal and coal fired power plants, copper and gold mining, iron ore and steel mills, aggregate and cement, pulp and paper mills, bulk shipping terminals, and mineral mining.

Engineered for flexible configuration, the BC2™ gives the end-customer the option to locate the blades directly on the bottom of the head pulley. Additionally, the HD Bolt-Up™ Tensioner let’s you simply and accurately configure the tensioning. Safe and easy to service, the ASGCO® BC-2™ Conveyor Belt Cleaner is the last belt cleaner you will ever need.

About ASGCO®

ASGCO® “Complete Conveyor Solutions” founded in 1971 and headquartered in Allentown, PA is a leading manufacturer, distributor and service provider of proprietary conveyor and screening equipment and accessories that improve the safety and performance of bulk material handling systems.

ASGCO® is a diversified and innovative company with three major divisions that serve specific targets of the material handling industry. The growth of the company, over the years, is due to recognized improvements in the efficiency, safety and productivity of our customers operations. At ASGCO® we continue to strive to make the handling of bulk materials more efficient, safer, and more productive.
