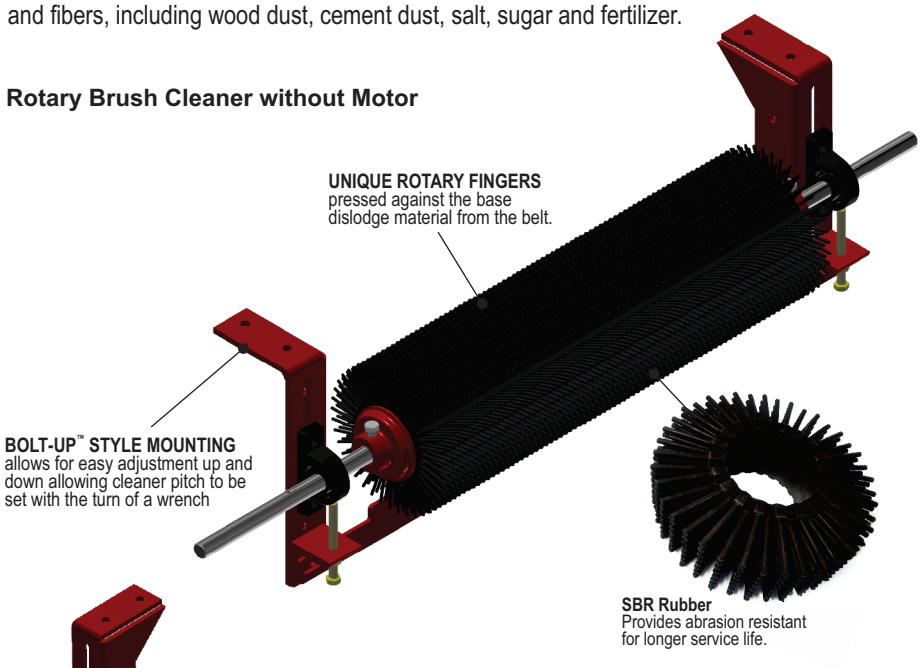
CHEVRON BRUSH CLEANER™

Secondary Belt Cleaner

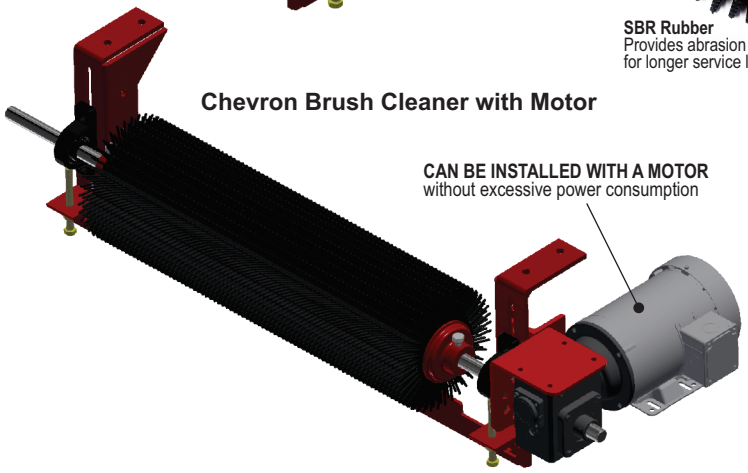
ASGCO®
Complete Conveyor Solutions

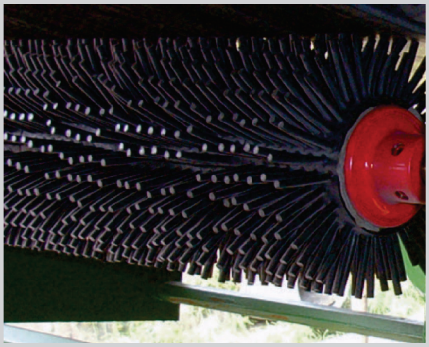
The **Chevron Brush Cleaner**™ secondary belt cleaner uses the speed and force of the belt rolling over hundreds of SBR finger tips, to provide effective cleaning on material that clings to cleated belts. Our Chevron Brush Cleaners are designed for difficult applications, fines and fibers, including wood dust, cement dust, salt, sugar and fertilizer.

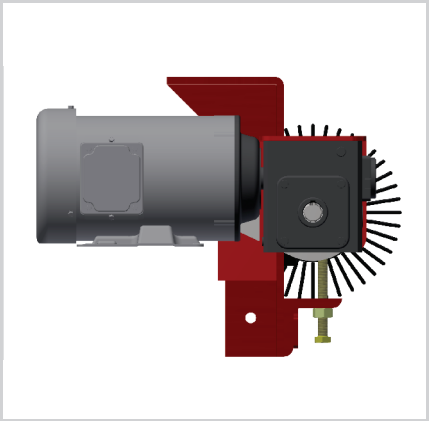
Rotary Brush Cleaner without Motor



Chevron Brush Cleaner with Motor







- **Excellent Elastic SBR Rubber Fingertips** - efficiently remove any materials that adhere to the belt surface, reducing serious material accumulation and residue build-up on the return rollers.
- **Fast and Easy** - installation, adjustment, maintenance and blade change-out.
- **Sweeping Action** - unique rotary fingers remove the carry-back and are designed to work only when the conveyor belt is running.
- **Reduces Carry-back** - which results in lower clean-up costs and less unplanned downtime.
- **Works Great** - on chevron, ribbed or cleated belts
- **Can Be Installed With A Motor** - without excessive power consumption.

PRODUCT SPECIFICATIONS

Maximum Belt Speed - 700 fpm (3.5 m/sec)

Applications - Fines, Wood Dust, Cement Dust, Salt, Sugar, Fertilizer, Wet Sand and Carbon Black.
