

Solutions Package

Kickstart the implementation of industrial internet of things (IIoT) solutions into your facility with streamlined ordering and support to work smarter, not harder.

The comprehensive solutions package will help you improve reliability and optimize your operations with OPTIFY™ for condition monitoring—supported by expert on-site installation and backed by our dedicated, US-based customer support teams.

Package contents:

OPTIFY Sensor Qty: 20	Part number: 750000	The OPTIFY Sensor is an easy-to-use, wireless sensor for monitoring the health of mechanical power transmission equipment, allowing users to reduce downtime, improve reliability, and operate safely.
X1000 Gateway – Plug-and-Play Qty: 2	Part number: 749921 (AT&T) 749922 (Verizon)	The X1000 Plug-and-Play Gateway connects your IIoT solutions to OPTIFY for condition monitoring in challenging applications, supported by a 4G mobile network connection (AT&T or Verizon).
OPTIFY reports	Frequency: weekly	Detailed asset health reports for your OPTIFY plant are automatically generated and included in your package, providing you with an overview of your operations to gain valuable insights at a glance.
Field services site installation	Frequency: 1 day*	Expert service technicians can assist with on-site installation, commissioning, diagnostics and troubleshooting, and training for Dodge® products included with your package.
Dedicated support		Access industry-leading customer service at your fingertips when you need it most. The US-based team of experts at Dodge is committed to providing premier support to help you succeed.

*Cost estimated for 1-day site installation
