

VUL-CON[®] SILICONE RELEASE PAPER

SILICONE RELEASE PAPER FOR VULCANIZED BELT SPLICING

VUL-CON[®] Silicone Release Paper is a specially formulated calendered Kraft-type paper with a silicone non-stick coating. It is engineered for use as a release material between the rubber and vulcanizing press. It can be used in step splicing, finger splicing and steel cord splicing of all types of belts.

PROPERTIES:

- Paper Type: #70 Kraft
- Color: Yellow
- Release: Silicone Treatment (both sides)
- Temperature QC: will darken showing areas of temperature spikes
- Shelf Life: 6 Months at 21 °C (70 °F) or 12 Months at 10 °C (50 °F).

FEATURES AND BENEFITS

- Extends the durability of vulcanized splices
- Improves flexibility and strength of conveyor belt splices
- Removes surface contamination in standard applications using double-sided silicone coating
- Suitable for rubber belt splices made of Natural Rubber (NR), Polyisoprene (IR), Styrene Butadiene (SBR), Polybutadiene (BR), and Polychloroprene (Neoprene, CR)
