

VUL-CON®

SILICONE RELEASE PAPER

SILICONE RELEASE PAPER FOR VULCANIZED BELT SPLICING

VUL-CON® Silicone Release Paper is a specially formulated calendered Kraft-type paper with a silicone non-stick coating. It is engineered for use as a release material between the rubber and vulcanizing press. It can be used in step splicing, finger splicing and steel cord splicing of all types of belts.

PROPERTIES:

- **Paper Type:** #70 Kraft
- **Color:** Yellow
- **Release:** Silicone Treatment (both sides)
- **Temperature QC:** will darken, showing areas of temperature spikes
- **Shelf Life:** 6 Months at 21 °C (70 °F) or 12 Months at 10 °C (50 °F).
- **Shelf Life:** 6 Months at 70 °F (21 °C) or 12 Months at 50 °F (10 °C)

FEATURES AND BENEFITS

- Double-sided poly reduces the risk of field contamination.
- Suitable for rubber belt splices made of Natural Rubber (NR), Polyisoprene (IR), Styrene Butadiene (SBR), Polybutadiene (BR), and Polychloroprene (Neoprene, CR)
- Double-sided silicone for easy release from press.
