

HEAVYWEIGHT CONVEYOR BELT SPLICE TRAINING PROGRAM

Take your maintenance skills to the next level in our industry-leading hands-on splice class. Over the course of two or three days, you will:

- **Learn Proven Techniques**—Expert instruction on plied and straight-warp belting for heavyweight conveyor belts
- **Gain Real-World Experience**—Learn how the process works, and how to apply this knowledge to your splicing program to improve quality.
- **Optimize Safety & Efficiency**—Discover best practices for proper and safe tool handling and how to optimize your process for reliability and efficiency.
- **Receive Certification**—Earn an ASGCO® credential that demonstrates your splice expertise to employers and clients

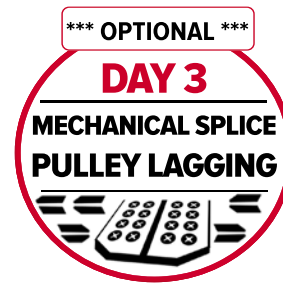

Ideal for: field technicians, maintenance supervisors, and anyone responsible for conveyor uptime. **Reserve** your spot now and start delivering stronger, more reliable splices—faster.

HANDS-ON TRAINING. REAL-WORLD RESULTS.

Hands-on training from ASGCO® experts to ensure proper installation, safety, and long-term splice reliability—wherever you need it.
